EDUCATION

Indian Institute of Information Technology, Jabalpur

B.Tech. Computer Science & Engineering

2021 - 2025

CGPA : 7.9/10

EXPERIENCE

BharatTech: CollegeCue - Full-Stack SDE Intern | *Next.js, TypeScript, React, Tailwind CSS*

January 2025 - Present

- Designed and improved user interfaces for an educational web platform using Next.js and Tailwind CSS, focusing on responsive design to enhance user experience across devices.
- Developed and integrated a chatbot feature, including message limits and an AI button, while optimizing data storage using parquet files for efficient chatbot data management.
- Contributed to full-stack development by integrating admin frontends for lead management (leads and lead tracker), built with Next.js, and integrated an AI model with the CRM.
- Enhanced backend functionality and real-time communication by applying chat backend optimizations, adding token authorization to Django API routes, developing a Django backend for real-time chat, and integrating websockets with the CollegeCue web app.

FusionIIIT: Course Management System | *Django, PostgreSQL*

January - April 2024

- Led a team of 5 to optimize course administration workflows, improving operational efficiency and enhancing the user experience.
- Engineered and documented RESTful API specifications for grade management interface using PostgreSQL, ensuring seamless integration and efficient data handling.
- Developed a file-sharing system for course materials, supporting multiple file formats and distributing lecture notes, assignments, and resources to over 300 users each semester.
- Developed an automated digital attendance tracking system, reducing manual intervention by half and enabling real-time student record updates.
- Successfully deployed on **fusion.iiitdmj.ac.in**

PROJECTS

TeamUp | *TypeScript, Next.js, MongoDB, Material-UI, Tailwind CSS, NextAuth*

June 2024 - October 2024

- Engineered a scalable collaborative project management platform with role-based access control, optimized for enterprise-level performance.
- Implemented real-time project updates and task tracking using MongoDB change streams, optimizing application performance through efficient database queries.
- Developed and documented RESTful APIs for project/task management with file attachment support, ensuring maintainable and scalable code.
- Integrated Google OAuth authentication and implemented secure authorization middleware for protected routes and API endpoints.
- Project available on **GitHub** and deployed on **Vercel**

Hotel Recommender System | *Python, Selenium, scikit-learn, Pandas, Flask*

November 2024

- Engineered a web mining-based hotel recommendation system using Python and Selenium to scrape real-time data from Google Travel (for educational purposes).
- Implemented a machine learning recommendation engine using scikit-learn's cosine similarity algorithm to match user preferences with hotel features.
- Developed a responsive web interface allowing users to filter hotels based on 12 different amenities and features.
- Built a Flask backend API to handle data processing and real-time recommendations.
- Project available on **GitHub**.

ACHIEVEMENTS

Xiaomi Ode2Code 3.0 | *Qualified Round 1 [Certificate Link]*

Ranked in the top 1,000 out of 60,242 participants, showcasing strong problem-solving and technical skills under competitive conditions.

SKILLS

Primary Languages: JavaScript/TypeScript, C++ , Python (familiar with Flask/Django),

Frameworks & Technologies: React.js, Next.js, Node.js, Chrome Extensions (Manifest v3)

Databases : MongoDB, PostgreSQL, MySQL, Firebase

Development Environment:Git, VS Code

Frontend Tools & Libraries: Material-UI, Tailwind CSS, Figma

Coursework: Database Systems, Data Structures & Algorithms

Soft Skills: Cross-functional team collaboration, Technical documentation
